

T2Parking CITIES

**Create or Edit Rates
and Schedules**

Step-by-step guide to create and edit rates and schedules.

In this tutorial, we will explain how to set up rates by editing and creating schedules in the system. The configuration of the schedule is key for the metered parking system as it is THROUGH THIS that we establish parking rates. Through this configuration, we assign and establish the rates.

1

Go to the T2Parking Cities portal. Fill in the fields with your credentials and press "Continue".

2

On the homepage, you will see important data for the control of your Parking Areas, such as statistics and relevant graphs for the administration of the city's metered parking. At the top, there is a horizontal menu with important sections. Press "Parking Areas".

3

In this section, you will see the schedules already created. Remember that each parking area has many parking zones. And each zone will have at least one schedule. Through the schedule, we establish the rates.

With this clarified, let's create a schedule. Press "Schedules".

5

To configure a schedule, set a name. For the same reason, it is recommended to be descriptive so it can be easily found when searching. Select the days the schedule will be valid, the time interval, and the currency that will enable users to pay for their parking space. Select the minimum time interval by which the parking time can be divided. If the intervals are 60 minutes, users can buy 1 hour, two hours, three hours, etc. Each schedule has its rate, so if you want to assign different rates to different types of vehicles, choose the types of vehicles that will be enabled to use those spaces at the price you set in this schedule. If you want to assign a different price to a specific type of vehicle, create a schedule only for that vehicle.

Press the "Billing Block" to generate the rate table.

The Billing Block will calculate your available metered parking time. It will divide the time into the minimum time blocks you configured and suggest a price. You can manually edit the price of each time block and adjust it to the needs of your city. Press "Create" once the prices for the parked time for that vehicle or those vehicles have been defined. Remember that if you want to assign different rates according to the type of vehicle, you will need to create a schedule for each type of vehicle that has a price differential. Example: downtown car, downtown motorcycle.

Billing Block

30 Minutes	Price (UY)	<input type="text" value="0.3"/>
60 Minutes	Price (UY)	<input type="text" value="0.6"/>
90 Minutes	Price (UY)	<input type="text" value="0.9"/>
120 Minutes	Price (UY)	<input type="text" value="1.2"/>
150 Minutes	Price (UY)	<input type="text" value="1.5"/>
180 Minutes	Price (UY)	<input type="text" value="1.8"/>
