

T2Parking CITIES

Distributor Tutorial

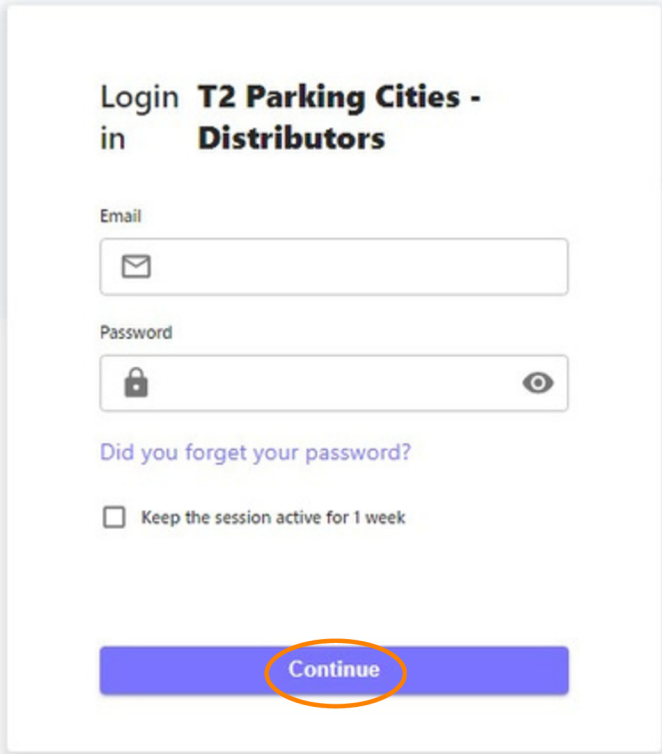

Distributor Tutorial

In this tutorial, we will show you how to use the T2Parking Cities app for distributors to sell tickets. The sales of metered parking will be assigned to those distributors who have previously agreed with the city's metered parking administrator on permissions and commissions. The administrator will provide the necessary access to the portal.

1

Go to the T2Parking Cities portal. Fill in the fields with the credentials provided by the administrator and press "Continue."

**Login T2 Parking Cities -

On the sales page assigned to the distributor, there will be a form to complete for each ticket sale. You must enter the parking user's phone number or email (one of the two is required by the system), their license plate number, and the parking area. In the "Schedule" section, choose the time range for which the parking is being purchased (if there is more than one per zone) or the type of vehicle. Also, select the amount of time for which the parking will be reserved.

If you wish to use an API so that users can manage the purchase from a platform under your domain, request this from the administrator who assigned you the permissions to coordinate the use of the API.

The screenshot shows the T2 Parking Admin interface. At the top, there is a navigation bar with the T2 Parking logo, a location pin icon, and buttons for "Nuevo Area de Parqueo" and "Continuar con la configuracion". A user profile icon is in the top right. Below the navigation bar is a menu with "Inicio", "Areas de Parqueo", "Usuarios", "Estadísticas", "Vehículos", and "Distribuidores" (highlighted in blue). The main content area is titled "Distribuidores" and has sub-links for "Distribuidores" and "API Tokens". Below this is the "API Keys" section, which includes a "+ Create new API key" button and a table of existing API keys. The table has columns for NAME, TOKEN, LAST TIME USED, and CREATION. One key is listed: "Company api key" with a long alphanumeric token, last used on 21 Jul. 09:48, and created on 21 Jul. 09:48.

<input type="checkbox"/>	NAME ↑	TOKEN	LAST TIME USED	CREATION
<input type="checkbox"/>	Company api key	api.key.fghjkljhgfdsgfghjkkjhgfdfuijngtyhsijsh	21 Jul. 09:48	21 Jul. 09:48
