## **Glossary**

# Glossary

## ***CITIES***

A platform for managing paid parking, used to administer various aspects of the parking system in a city.

## ***Distributors***

Entities authorized to sell parking tickets, assigned and managed by the T2Parking Cities administrator.

## ***Inspectors***

Individuals assigned to monitor and manage the parking areas, including applying penalties and tracking their activity and location.

## ***Parking Areas***

Larger areas that may include multiple parking zones. Usually referred to the city as a whole, as they are generally defined by legal and regulatory parameters.

## ***Parking Zones***

Sub-areas within a parking area, each with specific geographic boundaries and tariff and schedule configurations.

## ***Payment Methods***

Payment options available to users of the application (such as PayPal or Stripe) to pay for parking services.

## ***Rates***

Costs associated with the use of parking spaces, defined by time intervals and vehicle type.

## ***Schedules***

Time intervals during which specific parking rates apply in a given zone.

**Sensors**

Devices installed in parking spaces to detect real-time availability and assist in space management.

**Statistics**

Data and graphs showing the performance and usage of the paid parking system, used to make strategic decisions.

**Subscriptions**

Monthly subscriptions that allow parking in a specific zone without additional cost.

**Users**

People responsible for managing paid parking who use the application for management.

**Vehicle Types**

Classifications of vehicles that can be managed within the tariff system, such as cars, motorcycles, trucks, etc.
